

Izaack Avery

Program: Mechanical Engineering
Hometown: Port Hope, ON
Running for: First year Representative

Platform

I am an extroverted person with a lot of leadership experience and I'm hoping to become the representative for all Carleton Engineering first year students. I plan on **networking with my fellow first years** throughout the year to determine their views regarding the Engineering department and **make sure their voices and opinions on important topics are heard** and considered when decisions impacting their experience here at Carleton occur.

Experience

Though being a representative of others is new to me I have experience in community involved roles which include:

- **Scouts Canada** member (2016 - 2025), volunteer leader (2023 - 2025)
- **Library Page** worker (2021-2025)

And much more

About Me

I love to be outdoors, hanging with friends, and going out for a run (seriously ask me about it). I come from a small town with only 16,000 people so I am excited to explore Ottawa and all it has to offer. During my downtime I tend to either read books or watch movies.
