

VP ADVOCACY | POPPY GUILBEAULT

Hi, I'm Poppy! I'm in second year aerospace engineering (stream D). Leveraging our collective power to make change within the engineering department is vital to creating a productive learning atmosphere. As vp advocacy, I want to survey students to hear their concerns on how their courses, labs, and exams are being treated.

I also care deeply about making C-ENG an accessible and welcoming environment for all students. I want to highlight women in engineering, work on initiatives like black history month to uplift engineering students of colour, support students mental health, and much more.

ABOUT ME

I am involved in some clubs/societies that I absolutely love like EWB, CMAS, and CUAstro. I am a member of each club but I also participate within them to help out with events, media, and more. I love school and the carleton engineering community, and am currently taking a physics minor!! Outside of school, I like to draw, read, and spend way too much time on my phone.
