

## **Frankie Haller**

CSES Environmental Engineering Rep. Nominee

### About Me

I am a Environmental Engineering student in between my 3<sup>rd</sup> and 4<sup>th</sup> academic years, currently on a work term with Clearford Industries. I chose my program because I knew what my strengths were academically, and I knew whatever I did, it had to help the world somehow. From there, my branch of engineering was an obvious choice – finding ways to keep the things that we need to live (lean water, clean air, a clean Earth) so my tomorrow's world can be better than yesterday's.

In the community, I was most recently an EngFrosh 2025 Head, which was such an immensely rewarding experience it inspired me to take on more involvement and leadership within the community, and help pave the way for new students the same way past students did for me. In my second year, I helped with the EWB club as a Director of Fundraising, and am applying for that role again this year. In my past two years I have also been a general member of the CSCE.

Outside of school, I spend a lot of time playing music, trying to enjoy the beautiful fall we're having, and the occasional crochet (I can make a very ugly scarf at a very slow speed)

Super excited for what's next for my time here at Carleton and in the (very very awesome) engineering communitys
