

Ever wondered why SREE A is SSRE in Carleton Central? Why SREE is so hard? Why they made everything need 2602 as a prereq for everything, and retroactively applying it to your course tree?

Me too. I want to answer these questions and more next year.

My name is Alexandria, and I am in third year. I have completed the majority of the required courses for SREE and feel that I am in the perfect position to push for the needed changes for our program. Whether that be updates to the SREE courses or the addition/replacement of courses that could help fill knowledge gaps.

My goal for this year is to increase transparency between the SREE advisory board and student experience, through implementing the CSES SREE reps as student members of the committee, and using this platform to voice concerns brought up throughout the year.

I also plan to help promote cool events that are related to SREE and sustainability, internal or external to Carleton.
